
Northern Adelaide Plains Sustainable Irrigation Field Workshop

18 June 2015

Ali Hassanli, David Pezzaniti, Robert Stevens
and Measurement Engineering Australia

Efficient irrigation for farm profitability

Efficient irrigation practice can lead to:

- Water savings
- Greater yields
- Reduced power costs
- Less fertilizer loss
- Improve your soil condition

WE NEED TO KNOW ?

- How much water is the right amount?
- When is the right time to irrigate?

The answers to these depend on:

- Climate, water and soil characteristics.
- Irrigation system performance

In this workshop we will discuss:

- Plant, soil and water relationship
- Climate, plant relationship
- Salinity management
- Irrigation system performance
- Monitoring technologies and products
