Dear Property Owner

Northern Adelaide Irrigation Scheme – Community Engagement

SA Water is currently looking at ways to increase the volume of recycled water available for horticultural irrigation in the Northern Adelaide Plains, through the Northern Adelaide Irrigation Scheme (NAIS).

NAIS proposes to make use of recycled water produced throughout the year from the Bolivar Wastewater Treatment Plant. Recycled water produced during the Winter season needs to be stored in order for it to be used for irrigation during the Summer season.

A number of methods could be used to store recycled water, including using the local aquifer through a process called Managed Aquifer and Recovery (MAR). Some concerns have been raised regarding the location of a potential MAR scheme near Two Wells and we do not intend to proceed with this without fully exploring the community's views on this recycled water storage option.

Consequently, we will be engaging with the local community through a number of information sessions to hear your thoughts about different storage options, the outcomes of which will inform our future decision making.

These community information sessions will be held in the Virginia area during August 2015.

To register for an information session, or to receive updates on the project as it progresses, please complete the attached form and **return by Friday, 24 July 2015** using the enclosed envelope. The registration process will enable us to effectively plan and cater for each session.

Invitations, with the session details, will be sent to those that have registered for an information session.

In the meantime, if you would like to discuss the project further, please contact me on 08 7424 2185 or email jane.wilson@sawater.com.au.

Yours sincerely
